

# James Cadman Heating Technologies Ltd

*The total heated floor solution*

As part of the Cadman Group, James Cadman Heating Technologies Ltd now accompanies its sister companies, James Cadman Screeding Ltd and Cadman & Manpen Systems Ltd offering clients a wealth of experience and professionalism which has already served the construction industry for generations.

With the same hallmarks of quality, value and service ingrained into our business philosophy, The Cadman Group of companies is renowned throughout the construction industry for its ability to consistently deliver the highest of standards across all of its projects. Our past experience and innovative approach enables us to successfully manage the challenges of today's modern construction industry.

At James Cadman Heating Technologies Limited we pride ourselves in offering the best solutions for our clients requirements. Whether it is a renovation to a domestic property, through to large scale installations in a commercial project, we always ensure our clients needs are fully met.

James Cadman Heating Technologies Ltd was founded to meet client's demands for an underfloor heating and cooling solution in the ever expanding market place. Our partnership agreements with Flowcrete for the installation of ISOWARM, and REHAU for its under floor heating and cooling systems, places us at the forefront of under floor heating and cooling technology.

## **State of the art technology and design complements Flowcrete's new headquarters in Cheshire:**

Flowcrete Isowarm Underfloor Heating and Cooling System, combined with Isocrete K Screed, installed by James Cadman Heating Technologies Ltd and James Cadman Screeding Ltd - the perfect solution - giving a comfortable environment for staff and visitors alike.

The system comprised of an air source heat pump linked to the under floor heating, installation accuracy was crucial, as they were also utilising the heating and cooling effects of the air source heat pump, linked to the under floor system.

By offering both the heating system you require, combined with the floor

screeding, installed as a package, James Cadman Heating Technologies Ltd can remove the split responsibility which contractors normally face when letting separate orders for under floor heating and screeding.

- **Energy saving under floor heating**
- **Complete with installation of specified screed**
- **Comprehensive design and technical service**
- **Can be controlled to provide under floor cooling effect**
- **Single source guarantees available**

Our portfolio, to date contains several prestigious projects including the current wave of Liverpool BSF Schools. Cardinal Heenan & Broughton Hall Schools 8500m<sup>2</sup>, West Derby Ernest Cookson School 1500m<sup>2</sup>, and King David School, circa 2500m<sup>2</sup> all of which after installation of the heating system were then screeded by our in house sister company James Cadman Screeding Ltd.

**Ernest Cookson School**

**Private Dwelling**

**Cardinal Heenan Broughton Hall Schools**

Underfloor Heating is the favoured choice for industry professionals, practical, cost-effective and flexible, it is increasingly being specified over traditional radiator systems and establishing a reputation as the preferred modern-day heating solution. Our systems are particularly adaptable and can be installed in both old and new buildings under a wide range of floor coverings. The dual underfloor heating and cooling system can be installed in most buildings.

System examples:

- **Floating Floors**
- **Diffusion Plate Systems**
- **Raufix Systems**
- **Tacker Sheet Systems**
- **Pipe in air**

Our in house team of experienced professionals are there to help you choose the system which best suits your needs.
